Education

Master of Computer Applications (MCA),
Thangal Kunju Musaliar College of Engineering
2025 – 2027 | Kollam, Kerala
CGPA: 7.14

Bachelor of Computer Applications (BCA),
Malabar College of Advanced Studies
2022 – 2025 | Vengara, Kerala

Technical Skills

Programming
Python, Java, C, C++, JavaScript, TypeScript, PHP, SQL

Backend & APIs
Django, Django REST Framework, Flask, REST APIs, JSON, JWT

Frontend
React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap

Databases & Tools
MySQL, MongoDB, SQLite, Git, GitHub, Postman, VS Code

Other Technologies
Web Bluetooth API, BLE, Arduino/C++, QGIS, GeoJSON, Leaflet, MapLibre GL JS, Turf.js

Experience

Intern, *Elxtron Innovations Private Limited*
- Contributed to ELXIE, an ESP32-S3-based robotic toy controller integrating embedded firmware, BLE communication, and a web-based control interface.
- Developed two robot game modes, Echo Memory and Direction Invert, implementing game logic and robot-side functionality based on team lead specifications.
- Worked with React, Next.js, TypeScript, Web Bluetooth API, and Arduino/C++ for robot control, communication, and hardware–software integration.

Summary

MCA student with experience in software development, backend engineering, and database-driven applications. Skilled in Python, Java, SQL, and REST APIs, with experience in full-stack development, embedded systems, and algorithmic problem-solving.

Projects

SmartNav — Smart College Navigation System
- Developed a campus navigation system featuring 2D/3D maps, GPS tracking, and indoor navigation.
- Implemented destination search and A* pathfinding for room-level routing and turn-by-turn guidance.

Fake Job Detection — Machine Learning
- Built a fake job detection model using 17,880 EMSCAD job postings.
- Applied text preprocessing, TF-IDF and one-hot encoding for feature extraction.
- Achieved 98.91% accuracy, 88.29% F1-score and 99.42% ROC-AUC using Random Forest.

Hostel Leave Management System
- Developed a role-based hostel management system for leave applications, warden approvals, and attendance tracking.
- Implemented secure authentication, password hashing, SQL queries, access control, reports, and email notifications.

EventMap — Campus Event & Venue Platform
- Developed a campus event platform with live events, search, category filters, and countdowns.
- Built an interactive SVG campus map with venue markers, route guidance, and organizer-based event management.

Certifications & Achievements

Certified Python Fullstack Developer,
SMEC Technologies

Programming in Java, *Elite (90%) — NPTEL*
