PROFESSIONAL SUMMARY

MCA student with hands-on experience building full-stack web applications using React, Django, Flask, PHP, and SQL. Experienced with REST APIs, authentication, relational data modeling, and application business logic, with a strong interest in software engineering and problem solving.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, PHP
Frontend: HTML, CSS, React, Next.js, Bootstrap, Tailwind CSS
Backend: Django, Django REST Framework, Flask
Databases: MySQL, MongoDB, SQLite
Database / ORM: SQLAlchemy, Django ORM, Mongoose
APIs & Data: REST APIs, GraphQL, JSON, Graphene-Django, JWT
Tools: Git, GitHub, Postman, VS Code, XAMPP, MongoDB Atlas, Vercel

PROJECTS

Anime Movie Web Application

React, Django, Django REST Framework, SQLite, JWT, Axios, Bootstrap, Git

- Developed a React and Django REST Framework application with REST APIs for movie browsing, search, genre filtering, sorting, and server-side pagination.
- Implemented JWT authentication with protected React routes, authenticated DRF endpoints, and user-specific Favorites and Watchlist features using Django ORM.
- Integrated React and Axios with the Django backend for movie details, related movies, protected actions, and responsive views.

Hostel Leave Management System

PHP, MySQL, HTML, CSS, JavaScript, PHPMailer, Git

- Developed a role-based PHP/MySQL application for student leave requests, warden approvals, attendance management, and student presence tracking.
- Implemented session authentication, password hashing, prepared SQL statements, and role-specific access; integrated leave and attendance data to detect unauthorized absences.
- Built student management, leave approval/rejection, return tracking, mess-cut management, SQL-driven reports, and automated parent/teacher email alerts using PHPMailer.

Expense Tracker

Python, Flask, SQLAlchemy, Flask-Login, Jinja2, Bootstrap

- Developed a Flask expense management application with user registration, session authentication, protected routes, and password hashing.
- Implemented expense CRUD and SQLAlchemy-backed relational models for users, friendships, expenses, and shared expense splits.
- Built friend-based expense splitting and balance calculations based on payer information, with responsive Jinja2/Bootstrap interfaces for expense and friend management workflows.

EDUCATION

Master of Computer Applications (MCA)

Thangal Kunju Musaliar College of Engineering

2025 – 2027

Kollam, Kerala

Bachelor of Computer Applications (BCA)

Malabar College of Advanced Studies

2022 – 2025

Vengara, Kerala

CERTIFICATIONS & ACTIVITIES

NPTEL Programming in Java — Elite Certification, **90%**

NPTEL

GIS Workshop – HESTIA'26

TKM College of Engineering

CodeLess Coding Competition – INCEPTA'26

CET Trivandrum
